Journal of PHOTOCHEMISTRY AND PHOTOBIOLOGY B:BIOLOGY

Subject Index of Volume 32

Absorbance
characterization of pyridoxal phosphate as an optical label for measuring electrostatic potentials in proteins, 71
Action spectrum
the UVR wavelength dependence for lomefloxacin photosensitization of human skin, 165
Active oxygen
electron paramagnetic resonance evidence of the generation of superoxide ($O_2^{\cdot -}$) and hydroxyl ($^{\cdot}OH$) radicals by irradiation of a new photodynamic therapy photosensitizer, Victoria Blue BO, 49
Alga
influence of the presence of atrazine in water on the in-vivo delayed luminescence of *Acetabularia acetabulum*, 11
p-Aminobenzoic acid
photochemical formation of singlet molecular oxygen ($^1O_2$) in illuminated aqueous solutions of *p*-aminobenzoic acid (PABA), 33
5-Aminolaevulinic acid
photochemical and non-photochemical energy dissipation in response to 5-aminolaevulinic acid-induced photosensitization of green leaves of wheat (*Triticum aestivum* L.) and lettuce (*Lactuca sativa* L.), 115
Autumnal chlorophyll degradation
chlorophyll catabolism – structures, mechanisms, conversions, 141

Bacteria
photoinactivation of bacteria. Use of a cationic water-soluble zinc phthalocyanine to photoinactivate both Gram-negative and Gram-positive bacteria, 159
Biofilm
biological dosimetry of solar radiation for different simulated ozone column thicknesses, 189
Biological effectiveness
biological dosimetry of solar radiation for different simulated ozone column thicknesses, 189
Biologically effective UV dose
biological effectiveness of environmental radiation in aquatic systems, measurements by T7-phage sensor, 183
Biological UV-dosimetry
biological dosimetry of solar radiation for different simulated ozone column thicknesses, 189
Bioluminescence
influence of the presence of atrazine in water on the in-vivo delayed luminescence of *Acetabularia acetabulum*, 11
Biophysical techniques
influence of the presence of atrazine in water on the in-vivo delayed luminescence of *Acetabularia acetabulum*, 11
Bovine lens
in vitro UVB irradiation of bovine crystalline lens causes cell damage and reduction in leucine aminopeptidase activity in lens epithelium, 81

Carcinogenesis
adjacent guanines as preferred sites for strand breaks in plasmid DNA irradiated with 193 nm and 248 nm UV laser light, 97
Cationic
photoinactivation of bacteria. Use of a cationic water-soluble zinc phthalocyanine to photoinactivate both Gram-negative and Gram-positive bacteria, 159
Chlorella protothecoides
chlorophyll catabolism – structures, mechanisms, conversions, 141
Chlorophyll catabolism in green algae
chlorophyll catabolism – structures, mechanisms, conversions, 141
Chlorophyll catabolites in a chlorophyte
chlorophyll catabolism – structures, mechanisms, conversions, 141
Chlorophyll catabolites in angiosperms
chlorophyll catabolism – structures, mechanisms, conversions, 141
Chlorophyll fluorescence
the relation between the photochemical yield and variable fluorescence of photosystem II in the green alga *Scenedesmus obliquus*, 89
Chlorophyll fluorescence quenching
photochemical and non-photochemical energy dissipation in response to 5-aminolaevulinic acid-induced photosensitization of green leaves of wheat (*Triticum aestivum* L.) and lettuce (*Lactuca sativa* L.), 115
$^{14}CO_2$ uptake
effects of UV irradiation on certain physiological and biochemical processes in cyanobacteria, 107
Confocal microscopy
photodynamic action of phycocyanin: damage and repair, 19
Cyanobacteria
effects of UV irradiation on certain physiological and biochemical processes in cyanobacteria, 107
Cytochrome P450
tris(2,2′-bipyridyl)ruthenium(II)-mediated photoinduced electron transfer of engineered cytochrome P450 1A2, 171

Detergent
tris(2,2′-bipyridyl)ruthenium(II)-mediated photoinduced electron transfer of engineered cytochrome P450 1A2, 171
DNA damage
induction and repair of DNA damage in UV-irradiated human lymphocytes. Spectral differences and repair kinetics, 39
adjacent guanines as preferred sites for strand breaks in plasmid DNA irradiated with 193 nm and 248 nm UV laser light, 97
Drug phototoxicity
the UVR wavelength dependence for lomefloxacin photosensitization of human skin, 165

Electron transfer
tris(2,2′-bipyridyl)ruthenium(II)-mediated photoinduced electron transfer of engineered cytochrome P450 1A2, 171
Electrostatic potentials
characterization of pyridoxal phosphate as an optical label for measuring electrostatic potentials in proteins, 71

Elsevier Science S.A.

Energy dissipation
increased heat emission in photosynthetic apparatus of rye subjected to light stress, 67
Entering ratio of radiation
biological effectiveness of environmental radiation in aquatic systems, measurements by T7-phage sensor, 183
Epithelium
in vitro UVB irradiation of bovine crystalline lens causes cell damage and reduction in leucine aminopeptidase activity in lens epithelium, 81
EPR
electron paramagnetic resonance evidence of the generation of superoxide ($O_2^{\bullet -}$) and hydroxyl ($^{\bullet}OH$) radicals by irradiation of a new photodynamic therapy photosensitizer, Victoria Blue BO, 49

Fluorescence
characterization of pyridoxal phosphate as an optical label for measuring electrostatic potentials in proteins, 71
Fpg protein
photodynamic action of phycocyanin: damage and repair, 19
Free radicals
electron paramagnetic resonance evidence of the generation of superoxide ($O_2^{\bullet -}$) and hydroxyl ($^{\bullet}OH$) radicals by irradiation of a new photodynamic therapy photosensitizer, Victoria Blue BO, 49
photochemical and non-photochemical energy dissipation in response to 5-aminolaevulinic acid-induced photosensitization of green leaves of wheat (*Triticum aestivum* L.) and lettuce (*Lactuca sativa* L.), 115

Gram-negative
photoinactivation of bacteria. Use of a cationic water-soluble zinc phthalocyanine to photoinactivate both Gram-negative and Gram-positive bacteria, 159
Gram-negative bacteria
meso-substituted cationic porphyrins as efficient photosensitizers of Gram-positive and Gram-negative bacteria, 153
Gram-positive
photoinactivation of bacteria. Use of a cationic water-soluble zinc phthalocyanine to photoinactivate both Gram-negative and Gram-positive bacteria, 159
Gram-positive bacteria
meso-substituted cationic porphyrins as efficient photosensitizers of Gram-positive and Gram-negative bacteria, 153

Haemoprotein
tris(2,2′-bipyridyl)ruthenium(II)-mediated photoinduced electron transfer of engineered cytochrome P450 1A2, 171
Helicobacter pylori
ex-vivo treatment of gastric *Helicobacter* infection by photodynamic therapy, 59
Herbicidal pollution
influence of the presence of atrazine in water on the in-vivo delayed luminescence of *Acetabularia acetabulum*, 11
Heterocyst differentiation
effects of UV irradiation on certain physiological and biochemical processes in cyanobacteria, 107

Incision
induction and repair of DNA damage in UV-irradiated human lymphocytes. Spectral differences and repair kinetics, 39

Laser photolysis
adjacent guanines as preferred sites for strand breaks in plasmid DNA irradiated with 193 nm and 248 nm UV laser light, 97
Leucine aminopeptidase
in vitro UVB irradiation of bovine crystalline lens causes cell damage and reduction in leucine aminopeptidase activity in lens epithelium, 81
Leukaemic cells
merocyanine 540 mediated photoirradiation of leukemic cells. In vitro inference on cell survival, 27
Ligation
induction and repair of DNA damage in UV-irradiated human lymphocytes. Spectral differences and repair kinetics, 39
Light adaptation
the relation between the photochemical yield and variable fluorescence of photosystem II in the green alga *Scenedesmus obliquus*, 89
Light stress
increased heat emission in photosynthetic apparatus of rye subjected to light stress, 67
Linear tetrapyrroles
chlorophyll catabolism – structures, mechanisms, conversions, 141
Lomefloxacin
the UVR wavelength dependence for lomefloxacin photosensitization of human skin, 165
Lymphocytes
induction and repair of DNA damage in UV-irradiated human lymphocytes. Spectral differences and repair kinetics, 39

Mehler reaction
photochemical and non-photochemical energy dissipation in response to 5-aminolaevulinic acid-induced photosensitization of green leaves of wheat (*Triticum aestivum* L.) and lettuce (*Lactuca sativa* L.), 115
Meso-substituted cationic porphyrin
meso-substituted cationic porphyrins as efficient photosensitizers of Gram-positive and Gram-negative bacteria, 153
Methylene blue
ex-vivo treatment of gastric *Helicobacter* infection by photodynamic therapy, 59

Nitrogenase activity
effects of UV irradiation on certain physiological and biochemical processes in cyanobacteria, 107
Non-photochemical quenching
the relation between the photochemical yield and variable fluorescence of photosystem II in the green alga *Scenedesmus obliquus*, 89

Oxygen evolution
the relation between the photochemical yield and variable fluorescence of photosystem II in the green alga *Scenedesmus obliquus*, 89
Ozone depletion
effect of weather conditions on UV-B radiation reaching the earth's surface, 177
biological dosimetry of solar radiation for different simulated ozone column thicknesses, 189

Penetration depth of light between 400 and 800 nm
light scattering of human skin: a comparison between zinc(II)-phthalocyanine and Photofrin II, 3
Photochemistry
photochemical formation of singlet molecular oxygen ($^1O_2$) in illuminated aqueous solutions of *p*-aminobenzoic acid (PABA), 33
Photodynamic action
photodynamic action of phycocyanin: damage and repair, 19
Photodynamic therapy
light scattering of human skin: a comparison between zinc(II)-phthalocyanine and Photofrin II, 3
electron paramagnetic resonance evidence of the generation of superoxide ($O_2^{\bullet -}$) and hydroxyl ($^{\bullet}OH$) radicals by irradiation of a new photodynamic therapy photosensitizer, Victoria Blue BO, 49

ex-vivo treatment of gastric *Helicobacter* infection by photodynamic therapy, 59
Photofrin II®
light scattering of human skin: a comparison between zinc(II)-phthalocyanine and Photofrin II, 3
Photoirradiation
merocyanine 540 mediated photoirradiation of leukemic cells. In vitro inference on cell survival, 27
Photoreduction
tris(2,2′-bipyridyl)ruthenium(II)-mediated photoinduced electron transfer of engineered cytochrome P450 1A2, 171
Photosensitization
electron paramagnetic resonance evidence of the generation of superoxide ($O_2^{\bullet -}$) and hydroxyl ($^{\bullet}OH$) radicals by irradiation of a new photodynamic therapy photosensitizer, Victoria Blue BO, 49
effects of sonodynamic and photodynamic treatment on cellular thiol levels, 103
photochemical and non-photochemical energy dissipation in response to 5-aminolaevulinic acid-induced photosensitization of green leaves of wheat (*Triticum aestivum* L.) and lettuce (*Lactuca sativa* L.), 115
Photosensitizer
meso-substituted cationic porphyrins as efficient photosensitizers of Gram-positive and Gram-negative bacteria, 153
Photosynthesis
increased heat emission in photosynthetic apparatus of rye subjected to light stress, 67
pH-sensitive label
characterization of pyridoxal phosphate as an optical label for measuring electrostatic potentials in proteins, 71
Phthalocyanine
photoinactivation of bacteria. Use of a cationic water-soluble zinc phthalocyanine to photoinactivate both Gram-negative and Gram-positive bacteria, 159
Phycocyanin
photodynamic action of phycocyanin: damage and repair, 19
Polymerization
induction and repair of DNA damage in UV-irradiated human lymphocytes. Spectral differences and repair kinetics, 39
Porphyrins
effects of sonodynamic and photodynamic treatment on cellular thiol levels, 103
Protochlorophyllide
photochemical and non-photochemical energy dissipation in response to 5-aminolaevulinic acid-induced photosensitization of green leaves of wheat (*Triticum aestivum* L.) and lettuce (*Lactuca sativa* L.), 115
Pyridoxal phosphate
characterization of pyridoxal phosphate as an optical label for measuring electrostatic potentials in proteins, 71

Radiation amplification factor
biological dosimetry of solar radiation for different simulated ozone column thicknesses, 189
Repair
induction and repair of DNA damage in UV-irradiated human lymphocytes. Spectral differences and repair kinetics, 39
Ruthenium
tris(2,2′-bipyridyl)ruthenium(II)-mediated photoinduced electron transfer of engineered cytochrome P450 1A2, 171

Selective killing
merocyanine 540 mediated photoirradiation of leukemic cells. In vitro inference on cell survival, 27
Singlet molecular oxygen
photochemical formation of singlet molecular oxygen ($^1O_2$) in illuminated aqueous solutions of *p*-aminobenzoic acid (PABA), 33
Skin photosensitization
the UVR wavelength dependence for lomefloxacin photosensitization of human skin, 165
Solar radiation
biological dosimetry of solar radiation for different simulated ozone column thicknesses, 189
Spin trapping
electron paramagnetic resonance evidence of the generation of superoxide ($O_2^{\bullet -}$) and hydroxyl ($^{\bullet}OH$) radicals by irradiation of a new photodynamic therapy photosensitizer, Victoria Blue BO, 49
Strand breaks
adjacent guanines as preferred sites for strand breaks in plasmid DNA irradiated with 193 nm and 248 nm UV laser light, 97

Time-evolution of biologically effective dose
biological effectiveness of environmental radiation in aquatic systems, measurements by T7-phage sensor, 183

Ultrasound
effects of sonodynamic and photodynamic treatment on cellular thiol levels, 103
Ultraviolet irradiation
adjacent guanines as preferred sites for strand breaks in plasmid DNA irradiated with 193 nm and 248 nm UV laser light, 97
Underwater daily profile
biological effectiveness of environmental radiation in aquatic systems, measurements by T7-phage sensor, 183
Underwater UV dose
biological effectiveness of environmental radiation in aquatic systems, measurements by T7-phage sensor, 183
UVA
induction and repair of DNA damage in UV-irradiated human lymphocytes. Spectral differences and repair kinetics, 39
UVB
induction and repair of DNA damage in UV-irradiated human lymphocytes. Spectral differences and repair kinetics, 39
in vitro UVB irradiation of bovine crystalline lens causes cell damage and reduction in leucine aminopeptidase activity in lens epithelium, 81
UV-B Radiation
effect of weather conditions on UV-B radiation reaching the earth's surface, 177
biological dosimetry of solar radiation for different simulated ozone column thicknesses, 189
UV irradiation
effects of UV irradiation on certain physiological and biochemical processes in cyanobacteria, 107
UvrABC endonuclease
photodynamic action of phycocyanin: damage and repair, 19
UV radiation
induction and repair of DNA damage in UV-irradiated human lymphocytes. Spectral differences and repair kinetics, 39

Victoria Blue BO
electron paramagnetic resonance evidence of the generation of superoxide ($O_2^{\bullet -}$) and hydroxyl ($^{\bullet}OH$) radicals by irradiation of a new photodynamic therapy photosensitizer, Victoria Blue BO, 49

Weather conditions
effect of weather conditions on UV-B radiation reaching the earth's surface, 177

Xanthophyll cycle
increased heat emission in photosynthetic apparatus of rye subjected to light stress, 67
photochemical and non-photochemical energy dissipation in response to 5-aminolaevulinic acid-induced photosensitization of green leaves of wheat (*Triticum aestivum* L.) and lettuce (*Lactuca sativa* L.), 115

Zinc(II)-phthalocyanine
light scattering of human skin: a comparison between zinc(II)-phthalocyanine and Photofrin II, 3
